Hayden Powell trio is an acoustic jazz trio that plays both written and improvised music. All sound production should be focused on maintaining the original sound of the instruments. The musicians prefer to be placed close together and if possible, close to the audience. This may reduce the need for amplification and monitoring. The sound equipment should be a high-quality PA suited to the size of the venue. Monitors for each musician and a quality reverb should be available, in addition to the equipment listed below.

TRUMPET

- 1 quality condenser microphone suitable for trumpet.

PIANO

- Quality grand or upright piano, tuned on the day of the concert
- 2 high quality condenser microphones for amplification.
- 1 dynamic microphone for extra monitoring (if needed)

ACOUSTIC BASS

- 1 small bass amp, preferably Gallien Krueger.
- Di out of amp
- Music stand
